Summary

Senior Software Developer with over 20 years of successful experience in enterprise software development. Brings over 5 years of hands-on experience with modern JavaScript frameworks and .NET Framework with SQL Server. A clean coder who adheres to SOLID principles and emphasizes maintainable, high-quality code.

Technical Skills

- Angular, TypeScript, HTML, CSS, JavaScript
- .NET, C#, SQL Server
- AWS Cloud

Work Experience

Senior Front-End Developer, BrainRidge Consulting July 2025 - present

- – Developed and maintained scalable Angular components for BMO's digital banking suite, ensuring robust data flow between microservices and headless Contentful architectures.
- Integrated AI-assisted development tools (GitHub Copilot, Antigravity) into daily workflow to accelerate feature development, code generation, and refactoring across Angular applications.
- Leveraged AI tools to rapidly prototype UI components, generate boilerplate code, and streamline repetitive tasks, improving overall development efficiency.
- Used AI-assisted code suggestions to identify potential bugs, improve TypeScript typings, and enhance code quality during development and code reviews.
- Applied AI support to assist with writing unit tests, documentation, and refactoring legacy Angular components.
- Technologies used: Angular, RxJS, NgRx, GitHub Copilot, Contentful CMS.

Senior Front-End Developer, Rogers Aug 2022 - Jun-2025

- Led front-end development of sales and product pages supporting smart home security and streaming services (Netflix, Disney+).
- Implemented pagination and lazy loading on the channels page, optimizing page performance and enhancing user interaction.
- Technologies used: Angular 16, RxJS, NgRx, Node.js

Senior Front-End Developer, The Home Depot Feb 2021 - Aug 2022

- Enhanced the product page by adding the Home Depot label credit card promotion feature, driving increased customer engagement and conversion rates.
- Integrated a charity donation feature on the checkout page, boosting customer participation in charitable contributions and enhancing the brand's social impact.
- Implemented a sponsored products feature, generating additional revenue streams and increasing product visibility on the platform.
- Technologies used: Angular 10, RxJS, NgRx

Senior Front-End Developer, BMO Bank Jul 2020 - Feb 2021

– Contributed to the development of a digital mortgage document portal to minimize the need for in-branch visits during the COVID-19 pandemic, enhancing customer convenience and safety.
– Designed and implemented a reusable Angular component library, along with a showcase page, to support internal framework standardization and improve development efficiency across teams.
– Technologies used: Angular 9, Jest, AWS

Senior Front-End Developer, Ceridian Oct 2019 - May 2020
– Migrated a large Silverlight web application to HTML5.
– Improved web accessibility using latest accessibility standards and principles.
– Technologies used: Dojo Toolkit, JavaScript, HTML5, CSS3

Senior Angular Developer, Adesa Global Apr 2019 - Sep 2019
– Worked with designers, backend developers and product owners to build a world class online used car auction platform.
– Implemented type ahead search component using RxJS operators.
– Wrote all synchronous / asynchronous unit tests leveraging Karma/Jasmine.
– Created microservices using AWS lambda functions.
– Technologies used: Angular 7, RxJS, Node.js, AWS (Lambda, DynamoDB)

Senior Angular Developer, TD Bank Oct 2018 - Mar 2019
– Integrated existing risk management application with third party risk rating agencies.
– Improved risk management application with latest web technologies.
– Technologies used: Angular 5, C#, TypeScript

Senior Angular Developer, CPP Investment Board Feb 2018 - Sep 2018
– Design, develop and maintain a new product for Total Portfolio Management application.
– Design and develop restful API endpoints using Python.
– Technologies used: AngularJS v1.7, TypeScript, ES6, Bootstrap, Python, SQL Server

Senior Angular Developer, Capco Jun 2017 - Dec 2017
– Designed and developed PC financial credit card website
– Created restful mock backend API services.
– Technologies used: Angular 4, TypeScript, ES6, RxJS, Google Material Design, Flexbox, Node.js

Senior Software Developer, Bankrate Jul 2012 - Feb 2017
– Migrated mortgage rate service from WCF to Web API.
– Created prove of concept page using Vue.js and Angular2.
– Generated web page performance report using Google Page Speed service, reduced HTTP Requests and improved page load time by half.
– Technologies used: ASP.NET Web API 2.0, C#, LINQ, SQL Server, Knockout JS

Senior Software Developer, DealerTrack Canada Jan 2007 - Jun 2012
– Developed dealership finance and insurance software for the auto industry.
– Technologies used: ASP.NET, MVC 3.0, jQuery, JavaScript, C#, LINQ, PL SQL, Oracle 11g

Senior Software Developer, TD Bank May 2004 - Oct 2006

– Designed and implemented a Basel II risk management application. It helped senior lending manager to monitor and assess credit risk of large corporate loans.
– Designed and developed an XMLHttpRequest Engine to improve credit application status page navigation speed by an average of five times with one fifth the bandwidth overhead.
– Designed and developed GUI for applications and modules.
– Technologies used: ASP.NET, JavaScript, Microsoft InfoPath, SharePoint, C#, SQL Server

Education

Bachelor of Computer Science at **University of Inner Mongolia - China**

Certifications

2026 AWS Certified AI Practitioner - Foundational
2026 Claude Certified Developer - Foundations
